Color | Principles
color guide
the core palette and our grayscale palette are the first colors we use, and the ones that are most prominent, in all our branded communications.
the core palette and secondary palette are comprised of neutrals and of bold + bright colors. saffron is the bold color that can be grounded with the use of the more neutral agave in a layout. both work well for monochromatic graphics as well.
saffron
saffron is powerful when used sparingly as a highlight. we do not often use it as a background color.
agave is a versatile neutral that can be used effectively for a background, an image screen, or text.

Visual Identity Guide :: Design Elements

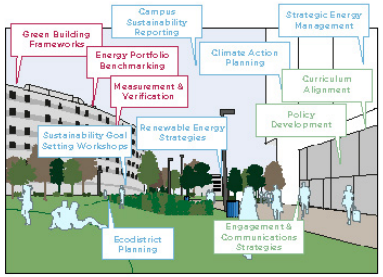

How Can Universities Advance Campus Sustainability?

evolveEA can help colleges and universities improve the performance of their facilities, save money and enhance their sustainability-related educational endeavors. Through comprehensive planning and coordinated action, college campuses can establish a broad culture of sustainability across their places and processes to help attract, engage and retain faculty, staff and students.

evolveEA is situated at the intersection of sustainability and the built environment. We create and advance systems for sustainability.

TOOLS FOR INTEGRATING SUSTAINABILITY THROUGHOUT INSTITUTIONS OF HIGHER LEARNING

BUILDING CAMPUS PEOPLE+PROCESS

OUR EXPERIENCE

evolveEA has worked with the following higher education clients:

- Carnegie Mellon University
- Chatham University
- Penn State University
- Point Park University
- Purdue University
- Saint Vincent College
- University of Vermont
- West Chester University

Sustainability for Airports and Aviation

evolveEA is a leader in advancing sustainability at every stage of the airport lifecycle—from terminal design to operations—through cutting-edge strategies that integrate green building, mobility, and systems thinking to deliver resilient, efficient, and forward-looking aviation infrastructure.

what we do

- OPR creation for parking facilities
- Sustainability goalsetting
- Construction and design consulting
- Energy and water use tracking
- Contractor onboarding and training
- Framework documentation
- Public art integration
- Construction waste & E&S tracking
- Communications & impact reporting
- Whole building lifecycle analysis
- Materials selection and tracking
- Net zero planning
